Introduction

400 Must-Have Words for the TOEFL® will help you improve your score on the TOEFL test. In particular, this book will build your TOEFL vocabulary for the new Internet-based TOEFL of 2005.

This book is designed for ease of use as a self-study guide. Its chapters were written for easy completion in one sitting—about 25 minutes. 400 Must-Have Words is also highly effective in the TOEFL-prep classroom.

Each chapter begins with a list of 10 target words. These words are defined and used in sample sentences. Usage tips are given for many words, as are any commonly used parts of speech related to the target word.

Following these definitions, the words are practiced in three exercises. TOEFL Prep I and TOEFL Prep II give straightforward practice in a variety of easy exercise styles. The last exercise, TOEFL Success, includes a TOEFL-style reading followed by one or two authentic TOEFL-style questions. Most TOEFL Success readings incorporate all 10 target words, and most also include an additional bonus structure. Each chapter ends with an answer key so you can check your work.

As an extra feature, this book includes a special front section called “Six Quick Hints for Success on the TOEFL®.” These hints give general test-taking advice for TOEFL success.

This book was written by ELT professionals who help prepare students for the TOEFL test. Their selection of words for this book was based on extensive experience with the TOEFL test, information about the corpus (body of words) that is used in creating the actual TOEFL test, and TOEFL materials published by ETS, the creators of the TOEFL test.

400 Must-Have Words for the TOEFL® is the best book on the market to improve your vocabulary for the TOEFL test.

Six Quick Hints for Success on the TOEFL®

1. **Try to understand a reading or lecture as a whole.** Unlike earlier versions of the TOEFL, the new version tests whether you can see how ideas interact in a longer reading.

2. **Take notes.** Especially in the listening section, you will need notes to remember what you have heard. Note-taking will also help you concentrate. You can practice by taking notes of news stories, documentaries, or lectures.

3. **Study grammar in context, not by itself.** Unlike earlier versions of the TOEFL, the new version has no grammar section. Your knowledge of grammar is useful in helping you understand the readings and lectures, not in answering grammar-specific questions.

4. **Practice writing essays that express your opinion on a topic.** The writing section of the 2005 TOEFL includes questions asking for your opinion on various daily topics. These are timed. Practice writing under a time limit, shaping your thoughts into a well-rounded essay.

5. **Build up your academic vocabulary.** Your ability to comprehend reading passages rests largely on your academic vocabulary. Build your vocabulary by reading, making flash cards, and writing sentences using new words in context. A strong vocabulary will help you not only in your reading comprehension, but also in listening, writing, and speaking.

6. **Commit your attention to the test.** Some of the topics covered in the test may not actually interest you. Still, your focused energy will improve your test score. Agree with yourself not to think about other topics during the test. Force yourself to keep your attention on the tested material.

TOEFL Success  Read the passage to review the vocabulary you have learned. Answer the questions that follow.

In countries like Niger and Mauritania, the *cultivation* of land has changed little in the past several centuries. Additionally, these countries’ mono-modal rainfall pattern brings *precipitation* for only three months during the year. As a result, food production doesn’t nearly meet demand.

**Bonus Structure**

As a result means “therefore,” “for this reason.”
Several agencies and organizations have intensified their efforts to increase the productivity of land in these countries. They have introduced new strains of seed, improved irrigation techniques, and introduced new methods of fertilization and soil management. With ample sunlight for photosynthesis and modern irrigation techniques, sustainable farming techniques should allow farmers to boost aggregate production in order to meet demand.

Still, crop revitalization faces an unexpected adversary: institutional incompetence. Where crop specialists have convinced individual farmers to abandon old farming techniques in place of new, they can’t readily obtain the governmental cooperation they need. The biggest hurdles are political corruption, incompetence, and the absence of a marketing infrastructure.

5. A well-written essay should make some kind of (catastrophe / impact) on its readers.
TOEFL Success Read the passage to review the vocabulary you have learned. Answer the questions that follow.

Nature challenges humans in many ways, through disease, weather, and famine. For those living along the coast, one unusual phenomenon capable of catastrophic destruction is the tsunami (pronounced “tsoo-NAH-mee”). A tsunami is a series of waves generated in a body of water by an impulsive disturbance. Earthquakes, landslides, volcanic eruptions, explosions, and even the impact of meteorites can generate tsunamis. Starting at sea, a tsunami slowly approaches land, growing in height and losing energy through bottom friction and turbulence. Still, just like any other water waves, tsunamis unleash tremendous energy as they plunge onto the shore. They have great erosion potential, stripping beaches of sand, undermining trees, and flooding hundreds of meters inland. They can easily crush cars, homes, vegetation, and anything they collide with.

To minimize the devastation of a tsunami, scientists are constantly trying to anticipate them more accurately and more quickly. Because many factors come together to produce a life-threatening tsunami, foreseeing them is not easy. Despite this, researchers in meteorology persevere in studying and predicting tsunami behavior.

1. Which sentence best expresses the essential information of this passage?
   a. Tsunamis could become a new source of usable energy in the next hundred years.
   b. Tsunamis do more damage to the land than flooding.
   c. Tsunamis can have an especially catastrophic impact on coastal communities.
   d. Scientists can predict and track tsunamis with a fair degree of accuracy, reducing their potential impact.

2. In the first sentence, why does the author mention weather?
   a. because tsunamis are caused by bad weather
   b. because tsunamis are more destructive than weather phenomena
   c. as an example of a destructive natural force
   d. as an introduction to the topic of coastal storms

3. Few sea turtles manage to live through their first year of life.
4. This age group tends to support current educational policies.
5. Her thinking about economics has changed slowly in the last several months.

**TOEFL Success**  Read the passage to review the vocabulary you have learned. Answer the questions that follow.

The *migration* from Asia to North America across the Bering Strait (perhaps by land bridge) was a *monumental* event in human history. The *process* of overspreading the Americas took more than 1,000 years, or 30 *generations*. This might seem to confirm common sense—that slow travel was *inherent* in any great migration without wheeled vehicles across unknown terrain. *Further thought* shows that this process was remarkably fast—about 10 north-south miles per year, on average. The Americas were populated at an astounding pace, when one considers the *physical* limits of the human body and the physical *features* of the American continents. Legs of humans can move only so fast under the best of circumstances, and they work even slower over mountain passes or deserts. Populations spread through the *diverse* regions of the Americas (grasslands, eastern forests, coastal swamps) and needed to *adapt* to their new environments. The migrants’ lifestyle had *evolved* over the years to that of professional nomads ensuring that they would find the resources needed to *survive.*
1. Which sentence best expresses the essential information in this passage?
   a. Human migration across the Bering Strait was remarkably slow.
   b. Physical limitations made migration across the Bering Strait almost impossible.
   c. Humans readily adapted to life in the Bering Strait.
   d. The migration through the Americas was surprisingly fast.

2. In this passage, the word **monumental** is closest in meaning to
   a. disastrous
   b. evolving
   c. important
   d. physical

Petroleum Alternatives

Target Words

1. constraint 6. emission
2. contamination 7. extinction
3. deplete 8. reservoir
4. dispose of 9. shrink
5. elementally 10. stable

Definitions and Samples

1. constraint  n. Something that restricts thought or action
   The constraints of military life kept Eileen from seeing Private Morris more than once a month.
   
   Parts of speech  constrain  v

2. contamination  n. Being made less clean by a germ or hazardous substance
   The contamination in the river came from the factory located just upstream.
   
   Parts of speech  contaminate  v, contaminant  n

3. deplete  v. To greatly decrease the supply of a resource or material
   The prolonged war depleted the country’s national treasury.
   
   Parts of speech  depletion  n
4. **dispose of v.** To throw away; to get rid of; to kill

   She disposed of her unwanted possessions before moving.

   The tyrant cruelly disposed of all his enemies.

   **Usage tips** Dispose of should be learned as a unit. In this meaning, dispose does not occur without of.

   **Parts of speech** disposal n, disposable adj

5. **elementally adv.** In terms of elements; basically

   Elementally, coal and diamonds are the same.

   **Parts of speech** element n, elemental adj

6. **emission n.** Sending out from a small space into the general environment; a substance discharged into the air

   The Environmental Protection Agency regulates the emission of pollutants into the air.

   **Usage tips** Emission is usually followed by an of phrase.

   **Parts of speech** emit v

7. **extinction n.** Complete disappearance; the end of existence

   Human beings have caused the extinction of many other species.

   **Usage tips** Extinction implies an absolute end; an extinct thing cannot be brought back into existence.

   **Parts of speech** extinct adj

8. **reservoir n.** A place where a liquid is collected and stored

   Cult members threatened to poison the town’s water reservoir.

   **Parts of speech** reserve v

9. **shrink v.** To become reduced in size, amount, or value

   If you dry your clothing on the “high heat” setting, they may shrink.

   **Parts of speech** shrinkage n, shrinkable adj
10. **stable adj.** Firm and dependable; showing little change

   He fell because the ladder wasn’t **stable**.

   *Parts of speech* stability *n*, stably *adv*

**TOEFL Prep I** Find the word that is closest in meaning to the opposite of each word in the left-hand column. Write the letter in the blank.

   _____ 1. stable  (a) keep
   _____ 2. contamination  (b) expand
   _____ 3. extinct  (c) unsteady
   _____ 4. dispose of  (d) existing
   _____ 5. shrink  (e) purity

**TOEFL Prep II** Circle the word that best completes each sentence.

1. The (constraints / contamination) of being in prison made her hate society even more.
2. A recognition that the Earth is round was one of the (elemental / shrunken) advances in thought during the time period.
3. Mother Teresa, who helped the poorest of the poor, had a great (disposal / reservoir) of love within her spirit.
4. Automobiles are responsible for some (emissions / extinction) of greenhouse gases.
5. By the end of the storm, the hikers had (depleted / reserved) even their emergency stores.

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the question that follows.

Human consumption of fossil fuels is expected to fully **deplete** the Earth’s crude oil reserves by the year 2060. As underground **reservoirs** of oil continue to **shrink**, we have no choice but to find alternatives. **One promising source**, with much cleaner **emissions**, is called bio-diesel. Bio-
diesel is often made from soybean oil, although it can be made from any vegetable oil that is not elementally different from soy. Bio-diesel can even be made from used cooking oils that homes or restaurants would otherwise dispose of. Bio-diesel can be used without constraint in any vehicle that runs on diesel—no modifications are needed. Presently, diesel engines can take up to 20 percent soy in their soy-diesel blend. As the need for bio-diesel increases and the technology improves, we may soon witness the extinction of the fossil-fueled vehicle. This is good news for the planet, as bio-diesel is a more stable source of energy than petroleum, and it reduces contamination of our air and water.

An introductory sentence for a brief summary of the passage is provided below. Complete the summary by selecting the three answer choices that express the most important ideas in the passage. In each blank, write the letter of one of your choices.

Bio-diesel is a promising alternative to fossil fuels.

Time Efficiency

Target Words

1. adjust  
2. arbitrary  
3. denominator  
4. exponentially  
5. infinitesimal  
6. maximize  
7. parallel  
8. proportion  
9. rate  
10. sequence

Definitions and Samples

1. **adjust**  *v.* To change; to get accustomed to something

   Travelers are advised to adjust their watches before arriving in the new time zone.

   *Parts of speech*  adjustment *n*, adjustable *adj*

2. **arbitrary**  *adj.* Chosen simply by whim or chance, not for any specific reason

   The decision to build a school in Blackberry Township was arbitrary, without any thought to future housing patterns.

   *Parts of speech*  arbitrate *v*, arbitrator *n*, arbitrarily *adv*

3. **denominator**  *n.* The number written below the line in a fraction

   In the fraction ½, the number 2 is the denominator.

   *Usage tips* The phrase *lowest common denominator* means “the most basic and unsophisticated things that most people share.”

   *Parts of speech*  denominate *v*, denomination *n*, denominational *adj*

4. **exponentially** *adv.* At a very fast rate

In Turkey, the value of the lira has decreased **exponentially** in the last several decades.

*Usage tips*  **Exponentially** is taken from mathematics, where an exponent is a number indicating how many times something is multiplied by itself. For example, $4^3$ contains the exponent “3,” indicating $4 \times 4 \times 4$.

*Parts of speech*  exponent *n*, exponential *adj*

5. **infinitesimal** *adj.* Immeasurably small

The number of contaminants in the water was **infinitesimal**, so the water was safe to drink.

*Parts of speech*  infinitesimally *adv*

6. **maximize** *v.* To increase or make as great as possible

A coach helps each athlete **maximize** his or her potential.

*Parts of speech*  maximum *n*, maximum *adj*

7. **parallel** *adj.* Being an equal distance apart everywhere

The street where I live runs **parallel** to the main road through town.

*Usage tips*  **Parallel** is often followed by *to*.

*Parts of speech*  parallel *n*, parallel *adv*

8. **proportion** *n.* A part in relation to the whole

The average employee spends a large **proportion** of each workday answering e-mails.

*Usage tips*  **Proportion** is often followed by *of*.

*Parts of speech*  proportionate *adj*, proportionally *adv*

9. **rate** *n.* The cost per unit of a good or service; the motion or change that happens in a certain time.

Postal **rates** in Japan are among the highest in the world.
Some grasses grow at the \textbf{rate} of one inch per day.

Time is, as we all know, money. Such valuation of time leads people to extreme efforts to maximize their use of time. Some people obsess over knowing the exact time. They buy clocks and watches that automatically adjust themselves over the Internet or by radio waves. These measurements allow them infinitesimal accuracy in dealing with time. Regardless of how one tracks time, most people share a common goal: They want to use time effectively. Since about 1982, this efficiency has increased exponentially each year, thanks to computers and their ability to multitask. In multitasking, a computer executes several different tasks in parallel. Rather than being set arbitrarily, each task is given a priority in the computer’s operating system, and time is spent in proportion to the priority of the task. The computer executes different sequences of tasks at different clock cycles, thereby increasing the rate of output from a process.

1. Why does the author mention computer multitasking in this article?
   a. because it is new
   b. because it measures time better than any clock
   c. because it helps people to arrange their activities sequentially
   d. because it is a good example of the efficient use of time

2. The underlined word sequences in the passage is closest in meaning to

Organic products from ancient life are an integral part of the Earth’s resources, offering scientists a more accurate picture of ancient life-forms. One key to ancient life comes in the form of petrified matter. Petrification is a process that slowly turns the remains of a living object into stone. In this process, minerals seep into a mass of organic matter. After the organic matter has been replaced, a mineral version of the living object is left. Petrification often occurs in trees that are found adjacent to rivers, floodable areas, and volcanoes, which provide the mud or ash that initially covers the organic matter. Some pieces of petrified wood retain the original cellular structure of the wood and the grain can be easily seen. Today, it is feasible to petrify wood in a simple laboratory process.

Fossils are another way that ancient life is preserved. Most fossils include an animal’s hard parts, such as teeth and bones. One type of fossil, called a trace fossil, may also include eggs, tooth marks, contents of the guts, and fossil excrement. Some products from ancient life offer us more than scientific knowledge. One such product is coal, a solid fuel of plant origin. It develops over millions of years, during which swamp vegetation is submerged in water, depleted of oxygen, and covered by layers and layers of sand and mud. These overlapping layers settle with the Earth’s movements and are compressed over time.

1. Which sentence best expresses the essential information of this passage?
   a. Preserved life-forms, including petrified matter and fossils, teach us about ancient life.
   b. The primary function for preserved life-forms is scientific discovery.
   c. Scientists try to replicate natural processes that preserve ancient life-forms.
   d. Ancient organic matter provides the most concentrated forms of energy known to humans.

As dependence on computers increases, so does the need for technical support. From *installation* of software to *detection* of viruses, computers require constant vigilance. Most larger companies find it most *expeditious* to maintain in-house computer staff. Many smaller companies, however, can’t fund their own full-time, in-house technical help. Instead, many of them assign the task of computer *maintenance* to a current employee who may not have any formal training. Rather, these “computer buffs” have *derived* their skills through practice and self-training. These self-appointed tech specialists, however, often cannot solve bigger problems. What’s more, they may see their office relations *corrode* when they are swamped with basic user questions that they simply don’t have time to address. For these reasons, many small companies choose to employ a freelance technical assistant who *circulates* among clients on an as-needed basis. With their professional training, these consultants may propose *innovative* solutions to users’ unique needs, which could vary from tracking inventory to *simulating* mechanized processes. They can *implement* new programs, train personnel, and escape the workplace before being asked, “How can I cut this file and paste it somewhere else?”

1. Which sentence best expresses the essential information of this passage?
   a. Larger companies are better off using freelance technical consultants.
   b. Computer maintenance and troubleshooting cuts into employee productivity.
   c. Self-trained technical support personnel are often as effective as trained professionals.
   d. Smaller companies may benefit from hiring occasional technical support.
2. The article implies that the question *How do I cut and paste a file?* is

a. too basic to require professional attention
b. a good question to give to in-house tech support
c. appropriate for a freelancer to address
d. a good topic for a training program

Most of the electricity in the United States is produced in steam turbines. There are many *discrete* steps in this process. In a steam turbine,
Combustion of coal, petroleum, or natural gas heats water to make steam. The steam rotates a shaft that is connected to a generator that produces electricity. Finally, that electricity is converted by a transformer and conveyed from the turbine to its place of use. Many sources can provide energy to heat the water in a steam turbine. Coal is primary, producing 51 percent of the country’s electricity. Another common way to heat water for steam turbines is through nuclear power. In nuclear fission, atoms of uranium fuel are hit by neutrons, triggering a continuous chain of fission that releases heat. In 2001, nuclear power generated 21 percent of the electricity in the United States. Solar power produces less than 1 percent of the United States’ electricity needs, because it is not regularly available and harnessing it is more expensive than using fossil fuels. Dependence on electricity permeates daily life in the United States. Still, few people are aware of the many components of electricity production.

1. What does the author say about solar power?
   a. It produces more electricity than any other source.
   b. It is a relatively small source of energy for heating water in steam turbines.
   c. Electricity producers are trying to use it more regularly.
   d. Researchers are trying to make it cheaper to use.

TOEFL Success  Read the passage to review the vocabulary you have learned. Answer the question that follows.

Like other functions of the human mind, perception and memory are imperfect. When we tell a story about something that we witnessed, we may intuitively believe that our recollection is accurate. However, several factors bias our memories of events. To study this anomaly, let us look at the three steps of memory creation: acquisition of memory, storing of memory, and retrieval. At every stage of memory formation, distortion can occur. At the first stage, acquisition of memory, events are perceived and bits of information are prepared for storage in the brain. However, it is impossible for us to remember every single thing we observe. Through processes that are both conscious and unconscious, people determine which details they will focus on.
In its second stage, storage, memories can become further distorted. Over time, our memories degrade, as we forget portions of events. To compensate, we may even creatively fill in the gap created by the recession of long-term memory. Additionally, an individual’s memory can be altered during the storage stage by intervening occurrences, which can be subconsciously combined with previously stored memories. Last but not least, we search our memory to locate information. During recall, emotion also seems to play a part in memory distortion. **In sum**, our memories may not be the indisputable source of information that we would like them to be.

In Russia, several religions coexist, including Christianity, Judaism, Islam, and animism. The most common religion is Christianity, and most Christians are members of the Russian Orthodox Church. The Church has existed for over 1,000 years, surviving even the official atheism of the Soviet era and the agnosticism that may have been even more prominent at the time. During the communist years, many Russians who practiced Orthodoxy sacrificed career and educational opportunities. The tenacity of Russian Orthodoxy may explain why even nonreligious Russians are inclined to call themselves Russian Orthodox. That same staying power drives the Church today, which is run by Aleksey II of Moscow. Born Aleksey Mikhailovich Ridiger, the future patriarch was from a very pious family. As a boy, Aleksey was often taken by his parents on their annual pilgrimages, when he most certainly began contemplation of the religious way of life he was to choose. As patriarch, Aleksey is exalted in the Church governance, but he is not deified. Aleksey has published articles on Church history and peacemaking in both the ecclesiastical and secular press, broadening the Church’s image both in Russia and abroad.

The man was decrepit. With high blood pressure, cancer, and liver disease, he aggravated his situation by smoking. His prognosis was death. His advanced lung cancer was terminal, and his family members knew that he would pass away soon. So no one was surprised to find him dead on that sharp winter Thursday, no one, that is, except one sharp-eyed detective,
who noticed the bedroom window ajar on the morning of the old man’s death. Would a fatally ill person be likely to sleep with the window open on a freezing cold night?

This question occupied forensic specialists from the medical examiner’s office. There, an autopsy revealed an unlikely wound on the victim’s thigh. Such a wound could easily have been inflicted by someone administering medicine . . . or poison. From there, the poison could travel through the veins, shutting down vital organs and causing death within seconds.

Indeed, the death turned out to be murder in the first degree. Criminal investigators persisted in their questioning of friends and family, only later finding the motive: money. Two distant relatives who stood to inherit large sums from the old man’s estate plotted the death, believing that the old man’s death would not be questioned.

1. Why does the author mention a wound?
   a. The wound caused the death.
   b. It was evidence of a struggle.
   c. It was suspicious.
   d. It was predictable, considering the man’s disease.

Since 1992, the number of cosmetic surgery procedures has risen 175 percent in the United States. Two of the most popular are liposuction and breast augmentation. In liposuction, the doctor inserts a small tube into the skin that sucks fat from the body. And while it may sound easy, it isn’t. Liposuction is so painful that people are often given anesthesia. **What’s more**, liposuction is not really a cure for obesity. Rather, it should be used when diet and exercise do not reduce fat in certain “trouble spots.”

Another common cosmetic procedure is breast augmentation. In this procedure, an implant is inserted through the armpit, making the breasts appear larger. Breast augmentation usually leaves only a small scar. Some common complications include the effects of anesthesia, infection, swelling, redness, bleeding, and pain. To reduce these risks, consumers are advised to be sure that their surgeon is board-certified.

1. Which sentence best expresses the essential information of this passage?
   a. Cosmetic surgery is dangerous.
   b. Many people do not have cosmetic surgery because of the pain.
   c. Cosmetic surgery is increasing in popularity in the United States.
   d. Breast reduction is almost as popular as breast augmentation.

Some say that sailors are a superstitious group. Long nights of watching stars predispose them to a belief in astrology. Long periods of isolation lead them to believe in psychic phenomena that others would laugh at. This may explain sailors’ frequent reports of seeing phantom ships. From the Gulf of Mexico, across the Atlantic, and to the South China Sea, sailors often claim that such vessels haunt the seas. One of the most famous stories of ghost ships is the Flying Dutchman, which sailed in 1680 from Amsterdam to Dutch East India under Hendrick Vanderdecken. When the captain ignored the danger warnings of a storm, his ship was smashed and the crew was lost. According to legend, his arrogance invoked the wrath of God, who condemned the lost crew-members to battle the waters off the Cape of Good Hope for eternity. Since then, there have been repeated sightings of the Flying Dutchman, one as recent as 1939. Many sightings of phantom ships occur in areas where vessels are known to have sunk. Sailors can never divine when or where they will next encounter a phantom ship. Rather, most of their sightings occur randomly, only later to bring forth information of a former sea horror. Some say that ghosts aboard a phantom ship are trying to use living sailors as their intermediaries. Still others think that the existence of phantom ships is merely a self-perpetuating myth for bored sailors who are prone to too much idle meditation about the meaning of life and death on the high seas.
1. How would the author explain phantom ships?
   a. Their appearance is tied to the stars.
   b. Sailors at sea have little to do.
   c. Fog and high waves can distort one’s vision.
   d. Shipwreck remains haunt oceans around the world.

2. Why does the author mention the *Flying Dutchman*?

The aborigines of Australia may have been some of the first people on the planet. Recent discoveries of **relics**, including stone tools, show that
humans lived near Penrith, New South Wales, about 47,000 years ago. Australian aborigines migrated from northern lands by sea, when the water passages were narrower than they are today. This is the first evidence of sea travel by prehistoric humans. The saga of this water passing survives in modern-day aboriginal folklore. To put this in perspective, remember that 50,000 years ago, humans were nomadic. Early aborigines did not cultivate crops, and in Australia at the time there were no animals that could be domesticated. No one knows how long it took aboriginal people to reach Australia, but archaeologists are searching through ancient campsites for vestiges of their early lifestyle. Fossilized remains indicate that these nomadic people not only gathered food from the land, but they also subsisted on meat from large animals that no longer exist today. As part of their hunting tradition, aborigines ritually covered themselves in mud to mask their own scent or for camouflage. Aboriginal society marked the major events of life with rites such as circumcision, marriage, and cremation. Older people were revered and cared for as great sources of wisdom. When Westerners arrived in Australia in 1788, the 300,000 aborigines who lived there were not eager to assimilate their ways. In the following years, disease, loss of land, and loss of identity shaped the aborigines’ history perhaps as much as their first prehistoric crossing from the north.

Nelson Mandela devoted his life to fighting prejudice in South Africa. Mandela traveled his state, organizing a fight against discriminatory laws and racial bias. He encouraged civil disobedience as a tool against the oppression of Blacks. As deputy president of the African National Congress, Mandela encouraged his fellow citizens to challenge the prevailing paradigm of power. Mandela believed that prejudice burdened not only the oppressed, but also the oppressors.

The government countered Mandela’s activities with a criminal conviction. Still, Mandela’s de facto leadership gained him respect and authority among his fellow citizens. Mandela’s courage and popularity worried the ruling class, who did not want to share power. What’s more, they refused to amend the state’s laws. So when Mandela returned from an overseas trip to gain support for his cause in 1962, he was arrested, jailed, and sentenced to life in prison for various crimes.

This only fueled Mandela’s notions about inequality and justice. He took his demands to jail, where he demanded the same dress and safety gear for Black prisoners as for White prisoners. After 28 years in prison, Mandela was released, returning immediately to public life. In 1994, he was elected the president of South Africa.

In the last three decades, universities across the United States have attempted to adapt their curriculums to meet the changing purposes of higher education. University education was also once considered an exclusive opportunity, with erudite scholars establishing courses based on the goal of training a distinctly academic “elite.” These days, not every
undergraduate is destined to become a scholar, and the roster of students represents a more complete cross section of society, including minorities, women, and returning students. These days, most learners attend university to fortify basic skills, primarily learning how to learn and how to express themselves. Far from its earlier religious or elitist image, the university is seen increasingly as a secular center for career development, where students know they will graduate into a competitive job market. Most professors have embraced this evolution in the university’s role, letting go of the traditional, parochial view of higher education. On the other hand, many feel that while they want to accommodate an adaptable curriculum, universities must not suspend their obligation of establishing rigorous requirements for education and graduation. Implicit in their stance is support for the traditional liberal arts curriculum with a core of classes required across disciplines.

1. According to information in the reading, which of the following sentences would the author be most likely to agree with?
   a. Universities are becoming increasingly exclusive.
   b. A curriculum needs to be completely adaptable to students’ needs.
   c. The role of higher education is changing, and so is the university curriculum.
   d. The cost of university puts it out of reach of many populations.

2. In this passage, the word elitist is closest in meaning to
   a. superior
   b. academic
   c. populist
   d. elegant

Until a century ago, military medicine was poor at battling disease. The ratio of soldiers killed by diseases to those killed in combat was probably at least two to one. For strategic reasons, military camps were often set up near a body of water. This gave some protection from enemy artillery, but it exposed soldiers to disease-carrying mosquitoes. Mosquitoes also plagued troops in the trenches. Low-ranking troops suffered the most. Officers who were advanced enough in the hierarchy slept in separate tents on high ground.

The long-held belief that disease resulted from evil spirits or bad air eventually ceased to rule military medicine. The germ theory mobilized actual science against disease. General George Washington ordered that his men be vaccinated against smallpox. Their allegiance to him can be measured by the fact that they obeyed, for Washington’s doctors used the actual smallpox virus, not the safer vaccination that Edward Jenner would introduce in 1798.

1. Which sentence best expresses the essential information of this passage?
   a. Army officers were far healthier than common foot soldiers.
   b. For a long time, a soldier was more likely to die of disease than in battle.
   c. Armies should camp on dry ground, not near water.
   d. Diseases are caused by viruses and spread by mosquitoes.

2. Why does the author mention that military camps were often set up near water?
   a. to explain why soldiers were not usually killed by artillery
   b. to show that officers and men did not mix
   c. to explain how soldiers came into contact with disease-carrying mosquitoes
   d. to show that water was valuable in treating “camp fever”

The Roman *conquest* of North Africa is, in the *prevailing* view, less interesting than Rome’s European adventures. In truth, one of the first
lands Rome *annexed* beyond the Italian peninsula was the area around Carthage in North Africa. Carthage and Rome had been in conflict (called the Punic Wars) since 264 BCE for control of trade along the Mediterranean coast. In 202 BCE, during the Second Punic War, the Carthaginian general Hannibal *devised* a clever plan, in *violation* of most military wisdom, to march through the high Alps to attack the Roman heartland. The cold weather and steep terrain *severely* stressed Hannibal’s forces, many of whom rode elephants. The Romans *resisted* Hannibal’s attacks, and his bold *invasion* force *collapsed*.

**In the end**, Rome finished off Carthage in the Third Punic War (149–146 BCE). At its *apex* in 117 CE, Rome controlled all of North Africa and territories from the Persian Gulf to Britain.

1. Which sentence best expresses the essential information of this passage?
   a. Romans were very successful at resisting invaders.
   b. Hannibal tried crossing the Alps on elephants to invade Rome.
   c. Rome and Carthage fought three wars, known as the Punic Wars.
   d. One of Rome’s first overseas conquests was of the North African state of Carthage.

2. The author of this passage believes that Hannibal’s attack on Rome by crossing the Alps was _________.
   a. not what most military commanders would do
   b. exactly what the Roman army used to do

Revisionist history promotes a new view of chronological events, usually for political purposes. Radical revisionists diminish the credibility of a previous view and may even deny that certain events happened at all. Some revisionist Asian historians have ignored long-standing conflicts among native peoples and have explained Asia’s conflicts as a consequence of colonialism and its class-oriented cultural milieu. Good motives among the revisionists—to promote reconciliation among traditional rivals—don’t excuse bad history. History is valuable only if its stories coincide with verifiable facts. From far away, an observer may see clearly that a given conflict had nothing to do with colonialism and a lot to do with 1,000-year-old rivalries. But this is not likely to matter much to a confirmed revisionist historian. At its core, revisionism—by the government in particular—is an Orwellian exercise in thought control, not honest science.

1. Which sentence best expresses the essential information of this passage?
   b. Revisionist history is less concerned with accuracy than with promoting a point of view.
   c. A new way of studying history, revisionism, has been very successful in Asia.
   d. Revisionist history is the only way to accurately relate events.

2. Why does the author of this reading mention Asia?
   a. because it offers an example of attempts at revisionist history
   b. because a civil war occurred between revisionists and others
   c. because it is the birthplace of revisionist history
   d. because it was colonized by Europeans and needs a revisionist history

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

The great unsettled question of economics is: “How much should the government **regulate** business?” Conservatives generally argue for a
decline in government involvement, but they favor certain subsidies to farmers, steelmakers, or airplane manufacturers. Some conservatives also see no conflict between their small-government views and their eagerness for the government to allocate more money for roads into national forests. The net result of these incursions into national forests is a tangible infrastructure that helps some companies but not the public. Publicly owned trees, land, and oil become commodities from which a few private companies (many owned by small-government conservatives) profit. No per capita benefit goes to the American people, aside perhaps from the brief anti-inflation effect that comes with new oil exploration.

1. What is the main idea of this reading?
   a. Conservatives have tried to keep others from expanding government regulations.
   b. Even though conservatives say they want to limit government involvement in business, they actually do often favor it.
   c. There are several views about the proper role for government in business.
   d. Small-government conservatives want the government to allocate a certain amount of federal money per capita to help all Americans.

2. Which of the following does the author claim?
   a. Industries will become subsidies.
   b. Oil exploration causes inflation.
   c. Some elements of nature will become commodities.
   d. Infrastructure will be made of trees, oil, and land.

1. The ________ in the hotel was obvious from such features as solid-gold faucets and stairs made of Italian marble.

2. In a show of his extreme ________, Jim Lavich flew 1,500 people to the Bahamas for his wife’s birthday party and ordered 300 casks of wine for them to drink.

3. The oldest and most respected furniture maker in western Michigan, VanEden Inc., earned its ________ by using good materials and listening to its customers.
4. France’s __________ was dismantled after the royal family was killed and lesser aristocrats were jailed during the revolution.

5. In the United States, many __________ families do not have health insurance because their employers don’t offer it.

TOEFL Success  Read the passage to review the vocabulary you have learned. Answer the questions that follow.

The United States is not the land of equal opportunity. There are no titles of nobility as in Europe, but astounding affluence is passed on in privileged families, and this makes all the difference. Studies in the 1970s found that a child of the elite and a child of the working class may start out with similar intelligence and drive, but the rich child is about 30 times more likely to prosper. The rich child goes to high-prestige schools, where his or her education may be only slightly above average, but where the child accumulates friendships with future leaders. The privileged child becomes comfortable with luxury and is at ease in situations where powerful people meet. The working-class child from a less-prestigious college is not likely to wind up impoverished, but neither is he or she likely to attend many parties of Yale or Vassar alumni.

1. Which sentence best expresses the essential information of this passage?
   a. The American economy is unfair and must be changed.
   b. Rich people have natural advantages in education and social contacts that help them succeed.
   c. Children accept one another as friends; only later in life do differences of wealth drive them apart.
   d. The only way to make money in America is to work and accumulate it yourself.

2. Why does the author of this reading mention Yale and Vassar?
   a. They are elite schools attended by many future leaders.
   b. They are where government officials have secret meetings.
c. They try to give working-class children a chance they can’t get at other schools.

d. Their high fees impoverish working-class children.

It is not easy to make a living as the **proprietor** of apartment buildings. There is a huge initial expense, not only to **acquire** the properties but to **assess** the buildings and to remove any **hazardous** materials like lead-
based paint. A landlord also has to buy the best liability insurance available just to safeguard the investment. Otherwise, one tragic accident could wipe out the value of the entire asset. Because of this expense, it’s rare to find a sole individual owning such a property. The risk is more often taken on jointly by a group of investors who then split the profits from the leases.

1. What is the main idea of this reading?
   a. Being a landlord is enjoyable.
   b. It costs a lot of money to be a landlord.
   c. Friendships can be destroyed by owning property jointly.
   d. Income from leases is greater than a landlord’s expenses.

**TOEFL Success**  Read the passage to review the vocabulary you have learned. Answer the questions that follow.

In the 1960s and 1970s, America was reaching the end of its role as a manufacturing power. Old-style systems of compensation, especially company pension plans, were impoverishing many companies. Much to the disadvantage of less-industrious workers, companies started demanding merit, not just seniority, before someone could be promoted. Many managers who were only marginally effective were encouraged to resign. These changes were painful, but unavoidable, symptoms of a growth spurt in the U.S. economy. Economies grow and change just as people do. A truly enterprising businessperson knows how to exploit these large changes and become involved in tomorrow’s dynamic businesses, not yesterday’s. There’s still plenty of money to be made in America, a very effective incentive for workers to adapt to new conditions.

1. Which sentence best expresses the essential information of this passage?
   a. Most companies cannot afford to compensate their employees like they used to.
   b. Anyone interested in making a lot of money should move to the United States.
   c. The 1960s and 1970s were times of great change for the American economy.
   d. Just as retailers adapt to economic change, so must manufacturers.

2. The author of this article expresses a negative opinion about ________.

Tomatoes, potatoes, and hot peppers, all originally from South or Central America, are among several plants that have disproportionately influenced cooking around the world. This happened only after a few intrepid eaters got beyond common fears about potatoes, tomatoes, and other products. Entrepreneurial hunters for new food products hardly knew what they were haggling for when they tried to extract from foreign markets goods that would sell well at home. Shuttling between Europe and exotic lands, Italians, Spaniards, and Britons in particular brought back food prototypes that were not obviously good things to eat—cinnamon bark, cousins of the dreaded nightshade (tomatoes), and even the pollen from a crocus flower (saffron). As a glance at international cookbooks will show, many creative merchants were well rewarded not just with financial success, but with culture-changing influence.

1. According to this reading, why did merchants have “culture-changing influence”?
   a. They found new ways to get from one country to another.
   b. Many of the plants they sold were poisonous and killed off some populations.
   c. They made it possible for cultures to develop new dishes.
   d. They spread European cooking habits around the world.

2. Cinnamon, tomatoes, and saffron are mentioned to make the point that
   a. many of the new plants merchants introduced were from Asia
   b. some strange-looking foods from odd sources were eventually accepted

Read the passage to review the vocabulary you have learned. Answer the questions that follow.

In the history of U.S. presidential *elections*, the year 1876 stands out as one of the oddest. That year, *polls* suggested that one person had won the popular vote but another had won more official electoral votes—just as happened in the year 2000. In 1876, however, the election was so *bitterly contested* that a special electoral commission was given the *authority* to determine which *candidate*—Republican Rutherford B. Hayes or Democrat Samuel J. Tilden—had won. This commission represented a *coalition* of interests. The Democrats favored this because otherwise the head of the Senate, Republican Thomas Ferry, would probably have been allowed to declare the winner. In the end, the Democrats were disappointed, as the commission *advocated* the Republican cause. The situation was not settled until March 2 of 1877, only three days before the scheduled *inauguration* of a new president—Hayes, *as it turned out*. Only then did America find out who its new leader would be. Americans seem not to have learned many lessons from 1876, however; because in 2000 there was still no official *policy* on how to settle an election that hung on a few contested votes. The problem was settled (by the Supreme Court) much faster in 2000, but still, no real system had been set up to deal with the situation.
1. In what way was the 1876 election even odder than that in 2000?
   a. It happened much earlier.
   b. It involved only two major candidates.
   c. One person won the popular vote and another won the electoral vote.
   d. The uncertainty over who would win the presidency lasted many months.

2. Who decided the outcome of the 1876 election?
   a. a special electoral commission
   b. Thomas Ferry
   c. the Supreme Court
   d. Rutherford B. Hayes

One of the most controversial murder cases of the twentieth century was that involving the death of Marilyn Sheppard in 1954. Her husband, Dr. Sam Sheppard, was accused of killing her and then injuring himself. An unlikely suspect, Sheppard was highly respected by his peers in the medical world. Still, there were odd aspects to the murder that Sheppard could not explain away. Unfortunately for Sheppard, none of his supporters actually witnessed the crime, so nobody could back up Sheppard’s claim that the real killer was a bushy-haired man whom Sheppard had chased across his lawn and fought with briefly.

Sheppard was eventually convicted of the offense, but many people doubted the verdict. With aggressive help from a lawyer named F. Lee Bailey, Sheppard got a new trial. Bailey suggested many alternatives to Sheppard’s guilt, enough that the new jury could not say he was guilty beyond a reasonable doubt. Sheppard was released from prison but died soon afterward. His son, Chip, pursued the case through several civil and criminal proceedings in an attempt to find out the truth about his mother’s murder. Late in the 1990s, new DNA analysis techniques proved that someone other than Sam Sheppard and his family had been in the house that night. Sheppard’s story about the bushy-haired man had probably been accurate all along.

1. Why was the Sheppard case unusual?
   a. A husband was accused of murdering his wife.
   b. The murder occurred in 1954.
   c. Doubt about the guilty verdict led to a second trial.
   d. The accused murderer said he didn’t do it.

The Fourth Amendment to the U.S. Constitution protects citizens from unreasonable search and seizure. Some civil libertarians have condemned the federal antidrug bureaucracy for threatening this basic right. In a drug case, police need no evidence to intrude on private property, apprehend a suspected dealer, and seize all the person’s property. Property taken under this law may be sold for a profit later by the law-enforcement officials involved in the raid. The target of a raid might be implicated only by an unreliable report from an unfriendly neighbor. The police are not required to ascertain whether there’s any physical evidence of drug activity at the site. In one case, surveillance of a large California property convinced local authorities to seize it—not because they saw drug activity but because the property was worth a lot of money. The property was taken, and its owner was shot trying to defend himself. A later inquiry determined that there were no illegal drugs on the property.

1. According to this reading, which of these activities does the author oppose?
   a. marijuana possession
   b. surveillance
   c. property seizures
   d. civil libertarians

2. Why does the author of this reading mention the Fourth Amendment?
   a. because drug-related seizures seem to violate it
   b. because it outlaws the use of certain drugs
   c. because it has finally stopped the antidrug forces from seizing property
   d. because he disagrees that Americans should be protected by it

**Bonus Structure**—*This refers to the whole situation described in the previous sentence, not to any one noun phrase.*

In 1979, two British farmers reported that, while sitting on a hill, they suddenly saw the crops below flattened in a perfect circle. They *inferred* that some great force must have come down directly from above to squash the corn and barley. *This* started a public hysteria about so-called crop circles. The patterns pressed into the crops (not all of them
were circles) seemed to have no entry or exit points. Many people hypothesized that only alien spaceships could make such bizarre imprints. Others, including Britain’s police, assailed such wild conclusions. They had a contrary theory: Someone was playing a big hoax. Teams of investigators took samples of the plants and the soil, trying to objectively analyze the crop circles as if they were a crime scene. Public curiosity often impaired the investigators, who had to tolerate busloads of tourists flocking to the circles. The farmers in the area, long suspicious of the police, approached the case as an instance of police versus the people. If the local farmers knew the circles were a hoax, they wouldn’t say so.

1. According to the article, why did many people think that crop circles were created by alien spaceships?
   a. The circles looked like they had been made from above and had no way in or out.
   b. The observers in 1979 reported seeing a UFO land and make a crop circle.
   c. The plants and soil inside a crop circle contained chemicals not found on Earth.
   d. They were in unusual shapes and contained alien symbols.

2. Why does the author mention “a hoax”?
   a. because one of the locals admitted playing a trick on his neighbors
   b. because most people think that crop circles are evil
   c. because police investigators thought crop circles were made by humans as a joke
   d. because crop circles are probably made by secret government aircraft

5. President Carazza came to office promising (reform / integrity) of the prison system.

TOEFL Success  Read the passage to review the vocabulary you have learned. Answer the questions that follow.

In many countries, few politicians have enough integrity to resist corruption and bribery. Because such practices are so prevalent, officials often evade any personal sense of guilt by pretending that everyone is just as corrupt as they are. Even in cases of really grotesque corruption, the kind that might cause a scandal in a less-corrupt government, the general population may not be shocked. Instead, they may cynically conclude that government corruption is natural and unavoidable. In this environment, the efforts of an honest politician to unmask corruption may be eroded by the public’s lack of interest, causing any efforts at reform to fail.

Bonus Structure—In this environment means “under these conditions.”
1. Why do people in some countries not react negatively to corruption?
   a. because they feel it cannot be avoided
   b. because they want reform
   c. because almost everyone in the government is corrupt
   d. because they have paid money to gain influence

2. What effect might a small scandal have in a country where government corruption is not typical?
   a. It could make someone very popular.
   b. It could cause a politician to become cynical.
   c. It could cost a lot of money.

TOEFL Success  Read the passage to review the vocabulary you have learned. Answer the question that follows.

The Spanish explorer Pizarro’s *abduction* of the Inca King Atahualpa came in 1529. His men *detained* the king, *coerced* the Incas into paying a large ransom in gold and silver, and then *intentionally* killed the king anyway. Their conquest of Peru established the legendary Spanish Main—Spanish holdings on the mainland of Central and South America. The *predicament* for Spain’s kings was how to get the riches of the New World to Spain. Pirates and privateers ruled the waves. To *distort* what was actually just robbery, the king of England issued “letters of marque,” licenses that turned certain pirates into agents of the British government. Their *piracy* against Spanish ships and Spanish gold was considered service to the king or queen of England.

Most pirates with such letters were social *deviants* anyway, and *predictably*, they became embarrassments to the British crown. In 1603, Britain’s King James I canceled all his government’s letters of marque. The many dangerous, unemployed pirates became buccaneers, a terrifying mix of tough characters that operated from the island of Hispaniola. They conducted merciless raids on Spanish settlements and formed a brotherhood known for theft, torture, *smuggling*, and *villainy* of all sorts.

An introductory sentence for a brief summary of the passage is provided below. Complete the summary by selecting three answer choices that express the most important ideas in the passage. In each blank, write the letter of one of your choices.

The establishment of the Spanish Main provided rich targets for pirates and privateers, often with government encouragement.

Bonus Structure—Predictably means that the information that follows is no surprise.
a. Pizarro’s men abducted King Atahualpa in 1529.
b. By issuing letters of marque, the kings of England gave their approval of raids on Spanish ships.
c. Piracy in the South China Sea was also a problem at this time.
d. Pirates who worked for the English crown were known as buccaneers.
e. Sailing under a letter of marque, a privateer could steal property in the king’s name.
f. Eventually, the English crown was embarrassed by the behavior of its privateers and canceled the letters of marque.

Illegal addictive drugs, like heroin or cocaine, come from plants grown and harvested mostly by poor farmers. Their small farmhouses juxtaposed with the mansions of billionaire drug lords illustrate the unequal payouts to various players in the drug trade. The farmers sell their product cheaply to a drug-distribution cartel that is owned by the drug lords. People working for the cartel then refine the drugs into a concentrated form, or even modify them chemically to make them more potent and therefore more valuable. Other cartel members then transport the drugs to distributors for sale, smuggling them over huge distances, including international borders. Governments try to interdict smugglers, using both

1. You can’t expect to have family ________ if the members don’t respect each other.

2. In our family, the ________ who are closest in age get along the best.

3. If someone dies without a will, the possessions usually go to the next of ________.
4. Medical bills in his last year greatly reduced the ________ going to Tom’s wife.

5. Legally, parents have the same ________ of relationship to an adopted child as to their biological children.

**TOEFL Success**  Read the passage to review the vocabulary you have learned. Answer the questions that follow.

The nature of the family varies widely from culture to culture. In some societies, family members tend to stay in close **proximity** to their **kin**, never moving more than a few miles away from the **ancestral** home. In other places, while the members of one generation may all live near one another, their **descendants** in the next generation scatter widely. In such a case, it’s difficult to maintain the same family **cohesion** enjoyed by those who live close together. Sometimes marriage can govern family structure; for example, there may be strict traditions requiring a new bride to leave her **paternal** home and **siblings** to move in with her new husband’s family. Such traditions are followed, even by young couples who don’t like them, because going against them is likely to result in the loss of **inheritance**. Whatever one’s own **sentiments** about family structure, it is important to recognize that one culture’s family system is as **legitimate** as another’s.

1. Which of the following best states the main idea of this passage?
   a. Different family systems can be found worldwide, but each one deserves respect.
   b. Societies in which children move far away from their parents are not very cohesive.
   c. Although some societies still require a wife to move in with her husband’s family, this tradition is dying out.
   d. The most important factor in family happiness is close proximity to your relatives.

2. According to this reading, which family system is most common?
   a. Members of a family living in the same community.
   b. Family members spreading out and living in various cities.
   c. Young couples living with the man’s parents.
   d. It is impossible to tell from this reading.

TOEFL Success   Read the passage to review the vocabulary you have learned. Answer the questions that follow.

You can walk into any high school and spot the cliques: the jocks hang out here, the geeks there, the Goths and preppies in their areas. Teenagers feel a strong need to belong to a group, to associate with people with whom they share common interests or goals. Since adolescence is often a time when teens feel turmoil in their home lives, they seek affection and friendship outside the home. They look for other young people to bond with when their parents don’t seem to “understand.” Teens going through the various crises of adolescence can more easily confide in others their own age, with whom they have more in common. Teen cliques are by no means exclusive; membership can fluctuate on an almost daily basis, but the important thing is that group members feel a sense of solidarity and are willing to stick together.

1. According to the reading, why do adolescents search for friendship outside the home?
   a. They want to be accepted by the jocks and Goths.
   b. They think their parents don’t understand the problems they face.
   c. They want to be in a different clique every day.
   d. They want to talk about their parents with other teenagers.

2. According to the reading, do teens stay in the same groups all the time?
   a. Yes, because their parents want them to.
   b. Yes, because they share common interests.
   c. No, they may move from group to group quite frequently.
   d. No, most groups don’t accept new members.

_______________ 5. My continuing support for the candidate is based on my admiration for her.

TOEFL Success  Read the passage to review the new vocabulary you have learned. Answer the questions that follow.

Perhaps no emotion is more complex than passion. Passion can show itself in a negative way as a burst of anger, or in a more pleasant way, as love. Passion can engender blind devotion for a lover or plunge a person into despondent misery if he or she feels a lack of reciprocity in the relationship. Passion and love cause innumerable dilemmas, and people constantly seek out ways to understand these emotions, as evidenced by
the proliferation of articles, books, talk shows, and Web pages devoted to relationships. Many of these forums have loyal followings and have become cultural fixtures. The endless flow of information and opinions about the complex situations aroused by passion will probably not vanish anytime soon.

1. According to this article, which statement about passion is true?
   a. It can have good or bad effects.
   b. It can be easily explained.
   c. It helps people decide what to do.
   d. It is irrational.

2. According to the reading, why are there so many books and other works about passion?
   a. because people want a lot of advice about love
   b. because many people want to write about their own passion
   c. because reading about passion is relaxing
   d. because passion can also show itself as a burst of anger

3. Because the president was (obnoxious / contemptuous) of France’s opinion long ago, the French are not eager to help him now.
4. Mark (despises / berates) Henry and refuses to see him at all.
5. Turkey’s historic (antipathy / shame) toward Greece may be softening with the new generation.

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

   Some radio talk show hosts are masters of **obnoxious** insults. Callers to such shows should be prepared for **humiliation** if they dare to disagree with the host’s views. The host controls whether the caller can speak, so
he can *arrogantly berate* the caller without allowing the caller to respond. Some shows, especially on AM radio, have hosts who are *contemptuous* of nearly everyone. They regularly use *vitriolic* language to *stigmatize* whole groups of people, such as foreigners, liberals, gays, or women. Some hosts don’t actually *despise* the groups they insult. They simply use *antipathy* as a form of entertainment, and they seem to feel no *shame* about the damage they do.

1. Which phrase best describes the author’s point of view?
   a. The author enjoys listening to radio talk shows.
   b. The author believes talk shows can cause damage.
   c. The author thinks talk show hosts are disturbing but honest.
   d. The author argues that hosts are ordinary people just doing their jobs.

4. Even though it’s illegal, __________ of lawmakers by rich companies is common.

5. It’s natural for young people to __________ against society, but not with violence.
TOEFL Success  Read the passage to review the vocabulary you have learned. Answer the questions that follow.

Many adolescents and young adults go through a period when they rebel against what they perceive as an insincere world. Teens may take up causes such as radical environmentalism, protesting against the status quo. They may choose clothes that annoy their parents and associate with people from the fringes of society. This is a delicate period in a person’s life, full of chances to make bad decisions that could lead to juvenile delinquency and even jail. Conversely, it can be a time of personal discovery that strengthens teens in a moral rejection of hedonistic lifestyles. At this age they may fearlessly speak up against hypocritically self-righteous authorities and against manipulation by the news media. These adolescent protests can lead to conflicts within families and communities, but stirring things up can also lead to serious reflection and positive change.

1. Which sentence best expresses the essential information of this passage?
   a. Teens are hedonistic and self-serving.
   b. Many teenagers are radical environmentalists.
   c. Adolescents often create conflicts in their communities.

**TOEFL Prep II** Circle the word that best completes each sentence.

1. The materials that go into a work of art usually have little (abstract / intrinsic) value.
2. In the 1970s, artists known as “the Boston School” revived (realism / context) by rejecting abstract techniques and trying to capture the actual appearance of their subjects.
3. The colors of light that we can see are known as the visible (spectrum / perspective).
4. Medieval artists did not try to use (context / perspective) to give a sense of depth to their paintings.
5. The small, separate strokes of impressionist paintings give the works a dreamlike (portrayal / dimension).

TOEFL Success  Read the passage to review the vocabulary you have learned. Answer the questions that follow.

Whether something is “art” is largely a matter of opinion. Art that most people consider to have no intrinsic value can contain a great treasure of ideas and invention to someone who sees something special in it. Styles in all the arts range over a wide spectrum. Some good art is esthetically unchallenging and easy to understand. Other works are strange forms, totally out of context to everyone but the artist. One artist’s portrayal of an everyday object, such as a bouquet of flowers, may be grounded in realism and easily recognizable. Another painter’s depiction of the same bouquet may be very abstract, resembling flowers only in the artist’s mind. Regardless of the artist’s approach, the best art reveals new dimensions of experience and looks at the world from a fresh perspective.

1. Which sentence best expresses the essential information of this passage?
   a. Styles of art have changed throughout history.
   b. Realistic art has more meaning than abstract art.
   c. Esthetically pleasing art is too simple to contain much meaning.
   d. Works of art can mean different things, depending on one’s perspective.

2. According to this reading, what is one big difference between abstract art and realistic art?
   a. Abstract art is harder to sell.
   b. Abstract art is harder to understand.
   c. Abstract art is harder to produce.
   d. Abstract art is harder to look at.

2. The president’s response, “Wait and see,” was ________, meaning that perhaps he would take action, perhaps not.

3. In English writing, a mark called an apostrophe usually ________ a missing letter, as in *isn’t* for *is not*.

4. A circle with a plus attached (♀) is ________ of “woman” and of the planet Venus.

5. Farley was a poor, ________ boy from a remote area who later taught himself to read and write.
Johannes Gutenberg’s ingenious use of movable type in his printing press had a wide range of effects on European societies. Most obviously, readers no longer had to decipher odd handwriting, with ambiguous lettering, in order to read a written work. Gutenberg gave each letter standard forms, a move that had connotations far beyond the printing business. The inscriptions on tombstones and roadside mileposts, for example, could now be standardized. The cost of books decreased. Even illiterate people benefited indirectly from the advent of this invention, as the general level of information in society increased. However, Gutenberg’s press was of limited use for languages that used picture-like symbols for writing instead of a phonetic system. Systems of symbolic pictographs, each of which denotes a word, require many thousands of characters to be cast into lead type by the printer. Phonetic systems, like the Latin alphabet, use the same few characters, recombined in thousands of ways to make different words.

1. According to this reading, how did the invention of the printing press benefit illiterate people?
   a. It helped them learn to read.
   b. It raised the level of information in a society.
   c. It lowered the cost of books.
   d. It saved them from having to read ambiguous handwriting.

2. Why was Gutenberg’s press not very practical for languages that use picture-like symbols?
   a. because character-based languages are made of pictographs
   b. because phonetic alphabets are clearer
   c. because there are too many characters to make movable type for each one
   d. because Gutenberg was European, so he didn’t know any character-based languages

5. Movie stars that are especially ________ often take advantage of their charm to go into politics.
TOEFL Success  Read the passage to review the vocabulary you have learned. Answer the questions that follow.

When the artistic medium of theater falls into the hands of college students, the results can be unpredictable. At one college, we saw Shakespeare’s Hamlet done as musical theater. The idea was bad to start out with, and the actual play was amateurish, bordering on incompetent. The cast did not understand the tragic power of the play. Their improvisation when they forgot their lines was silly and inappropriate. The costumes and set design looked homemade, like something from an elementary-school skit. Three months later, however, this same group of students did a great job with the comedy A Midsummer Night’s Dream. Surprisingly enough, the actors were charismatic, played their parts with zeal, and achieved a hilarious result. It was no gala event, but we still felt that it was one of the best performances we had seen.

1. What word best describes the author’s opinion of the student performance of Hamlet?
   a. incompetent
   b. charismatic
   c. hilarious
   d. full of zeal

2. What is the author’s opinion of student performances in general?
   a. Students should not perform Shakespeare’s plays.
   b. Sometimes student productions are good, and other times they are not.
   c. All student shows are amateurish.
   d. Student performances should be gala events.

4. Her necklace was especially *(cumbersome / striking)* because of the diamonds it contained.
5. *(Vanity / Bulk)* led my grandfather to dye his hair and to dress like someone 40 years younger.

**TOEFL Success**  Read the passage to review the vocabulary you have learned. Answer the questions that follow.

The fashion industry encourages people to spend far too much time and money on clothes. **It’s natural for** humans to use clothing as a mark of
belonging to a group and to try to keep up with style trends. The fashion industry exploits this natural desire and turns it into a capricious, impractical, and expensive rush from one style to another. For example, in one recent year, fashion did an abrupt about-face. Early in the year, fashionable outfits showed a minimum amount of fabric and a maximum amount of skin. By late summer, famous fashion designers were drowning people in bulky, cumbersome outfits that looked five sizes too big. Vanity inhibits people from looking realistically at exotic clothing fads. A striking new style catches their eye, they look at the clothes they’re wearing, and they are suddenly vulnerable to the manipulation of the fashion industry.

1. Which word best describes the fashion industry, according to the author?
   a. striking
   b. minimum
   c. capricious
   d. vulnerable

2. What is one reason people buy the latest fashions, according to the author?
   a. Because they want to feel like they are part of the group.
   b. Because they enjoy spending money.
   c. Because the fashion world is bizarre.
   d. Because their clothes from last year don’t fit.
