Project title: Economic environment improvement in Vietnam according to WTO integration requirements
Coordinator: Pham Thi Hong Diep, PhD

Code number: QK.09.17
Implementing Institution: University of Economics and Business, VNU
Duration: from July 2009 to June 2011

1. Objectives:
- Analyse the situation of Vietnam in the process of economic environmental improvement according to WTO integration requirements.
- Suggest several solutions to continue the process of economic environmental improvement to fulfil WTO integration requirements in the coming time.

2. Main contents:
The research project reviewed literature about economic environment and economic environmental improvement; studied Chinese experience on economic environmental improvement according to WTO integration requirements and drew lessons for Vietnam.

The situation of Vietnam in the process of economic environmental improvement according to WTO integration requirements has been analysed. The study proved achievements as well as revealed the difficulties that the country has to face in improving it’s economic environment recently.

After analysing new global and domestic context that influencing on Vietnam’s international economic integration, the project suggested solutions to continue the process of economic environmental improvement to fulfil WTO integration requirements in the coming time.
